
Joseth Calderon Corredor

Frontend Developer

Phone Number: 3163589233

Email: josethcalderon266@gmail.com

PERSONAL DESCRIPTION

Frontend developer and UI/UX designer with two years of experience. I'm extremely comfortable using JavaScript, React, HTML, CSS, and Git. I've led startups, acquiring a 360-degree view of the business and customer experience. Passionate about innovation, I leverage AI to optimize processes and seek constant professional growth.

SKILLS

- **Frontend Develop:** I develop using JavaScript and React, with experience building advanced web applications and manipulating the DOM for fluid interfaces. I'm proficient in HTML and CSS, with experience using preprocessors like Stylus and libraries like Tailwind for responsive and aesthetically stunning interfaces. I effectively use Git for efficient version control and fluid project management.
- **Interface Design (UI/UX):** I develop responsive and optimal designs using tools like Figma for mockups and wireframes. I think creatively and innovatively, allowing me to generate solutions and strategies that meet the client's needs.
- **Leadership and Project Management:** Experience leading teams and participating in administrative and hiring decisions, providing a 360-degree view of the business and customer experience. Ability to identify problems and transform them into solutions, creating innovative products and services that connect emotionally and professionally with customers.
- **Language Skills:** B2 level in English for effective communication and A1 level in German. Committed to studying German to achieve a B2 level this year, demonstrating dedication to language skills in multicultural environments.

LABORAL EXPERIENCE

LehreTech

CEO & Founder

01/10/2025 - Actual

- Founder and leader in the development of a complete business model and in strategic decision-making for market launch.
- Robust product design and development, assuming roles in design, development, QA, and sales, with AI as a core component of the product.
- Implementation of multiple AI models to generate text, images, and videos, creating a comprehensive solution for clients.
- Customer acquisition and management, strengthening my soft skills and network to ensure the sales message was accurate and the product met their needs.

Norangle Solutions

Frontend Developer & Web designer

01/07/2024 - 25/10/2024

- Complete website development using technologies such as React and Tailwind.
- Responsive prototyping in Figma, ensuring optimal design and an efficient development process.
- Collaboration in structuring products for clients, which enriched my perspective on how to deal with and visualize their needs.

BienestarTu

CTO

01/10/2023 - 30/04/2024

- Leadership in website development and maintenance using NoCode tools and front-end programming with React, Tailwind, and HTML.
- Participation in administrative decisions and hiring processes, contributing significantly to the startup's growth and success.
- Architecture development and role management for backend development, ensuring seamless integration of systems.

FEAUTURED PROJECTS

Hackathon Filecoin: In 2024, I led the design and development of SciFile's frontend using React.js, TypeScript, Sass, and CSS, achieving third place.

Hackathon Solana: In 2024, I developed a graphical interface using React.js and Sass. The project, QuantumSapiens, caught the attention of two judges and became a professional project in active development.

Hackathon Chainlink: At the end of 2023, I collaborated with a 5-person team to build a project with React, CSS, HTML, and Solidity, receiving recognition from sponsors such as Scroll and Tableland.

FORMACIÓN ACADÉMICA

Analysis and Software Development Technologist

2024 - 2026

Comprehensive training in the software development lifecycle, from analysis and design to implementation and quality control, taking into account prototyping, agile methodologies, and an understanding of software architectures. Additionally, the program focuses on front- and back-end development, applying knowledge to create robust and functional solutions. Emphasis is placed on effective communication, quantitative reasoning, and project management, with a focus on innovation and entrepreneurship.

Platzi - Specialized Courses

- **Frontend School with React.js:** Mastering React for creating complex web applications, integrating design tools such as CSS, SASS, and Tailwind.
- **In-Depth HTML and CSS Learning School:** Expert knowledge in HTML, CSS, Tailwind, and Sass for creating robust structures, SEO optimization, and responsive design.
- **Professional Git and GitHub Course:** Mastering version control for efficient project management and team collaboration.

Others Studies

- **Evolve Your English (2021):** Comprehensive English skills, with a focus on verbal and written communication.
- **Academic Baccalaureate (2020):** Commercial Educational Institute (INEC).
